Hello everyone, It's been confirmed I am now working on an Earth & Beyond mod for Renegade. What's the point of this topic then you say? Well this'll be the place for; news, updates, beta sign-up (Don't ask now It'll have a private beta to begin with and then a public beta), screenshots and more ! The work on the actual mod hasn't begun yet because I am still () Waiting for that convertor Script to be released or until I get a copy of it .>> To view exclusive images please goto page 2 ! Here's some of the things I would like to include in the modification: Terran Enforcer (That's my ship in the beta) Terran Tradesman Jenquai Defender Jenquai Explorer Progen Warrior Progen Defender Many many many star bases including: Net7 Sol! Earth Station Luna Station Earth Corps High Command And many more of the Jenquai and Progen bases. And before you ask any questions or anything here is a quick FAQ for the mod: Why did I decide to create this mod ? Well as soon as I joined and downloaded the Earth & Beyond beta I loved it, so I thought to my self not long ago why not make a mod for Renegade of E&B. Not only will it boost publicity for the game (Which isn't at all the main reason for the mod) and also I think a mod of E&B would be great Isn't it illegal to take Westwood Studios models and use them in a modification ? Yes it is very illegal to do this, but I have been given Full Authorized use to use the models from E&B directly from Westwood themselves. Here is a quick sample from the e-mail I recieved about the models: code: Greetings! We are happy to inform you that you may make your MOD. We will, however, be unable to provide any assistance to support in this matter. Good luck Will there be a beta for this mod ? Indeed, there will be a beta for this mod. IN the early stages of the mod it will be strictly private but as the mod gets closer and closer to completion there will be a public beta test Why Earth & Beyond why not create other mods ? Well, Earth & Beyond really opened my eyes and I decided it would just be a great idea for a Mod. Where Can I find more information about this mod ? Currently this is the only place where information is being held about the Renegade mod, but soon there will be news and files for the mod on my website: planetshaun . Where can I find more information about the game E&B ? Some Earth and beyond sites include: www.earthandbeyond.com (Official site) www.ebportal.com Google There are many other sites you will just have to look for them . What's the best way I can ask questions about this modification ? There are currently 2 ways that you can ask questions which are: Here on the message Forum, or through the e-mail address found on my site. How many updates will be posted here regularly ? I will try and post as many updates as I can Ok, thats it . Use this topic to post; Ideas, suggestions, thoughts about the mod and any thing On Topic (The mod). Ok Over and out, --Shaun-- Your Star Ship. Your Galaxy HOW FAR WILL YOU GO ? Earth And Beyond the Roleplaying Galaxy [September 30, 2002, 14:52: Message edited by: Planetshaun.co.uk]

Ha ! Ack won't be getting this mod . And yeah this is definatly going to be finished this mod. The work will all begin when I get that convertor from Dante/Abjab. Did you know that the terimals in the Starbases that you manufacture etc from are 3 times the size of a AGT . LOL I put it into Level Edit .--Shaun--

I'm worried that the E&B models might be way out of scale with the Renegade models. If you can find a way to solve that problem, there is are an enourmous amount of assets in that game that you can harvest for your mod greg
