Neither of the import scripts are working for me anymore. I followed the instructions and nothing.
Renx - 3DS MAX 6.

Just Unzip to your %max5/scripts/ directory, click yes on replace.

Did it, and it doesnt show up.

Just Unzip to your %gmaxdir/gamepacks/Westwood/RenX/ directory, click yes on replace.

Did it, and doesnt show up.

Anybody fix this?

Customize->User interface then either bind it or a key or pull it on the toolbar (can be found as "import w3d"). This applies to the importer that shows the dialog to select what to import.
