Lol, just reinstalled renegade for new comp (not the one im on now) and i forgot the command for FPS display.So if you know it off the top of your head could ya share the info.

By the way, if i have SP2 installed what kind of affects does it have on my games?

Get the patch, and then press F8 and type FPS, then hit enter.

Don't listen to people who obviously screw up their SP2. SP2 doesn't do anything to games.
