Got a download prompt about core patch one, thinking it was the old one but heard many people downloaded it too.

But few problems why has it got horrible bulky text and why has some of my maps got rainbows in em see pics to see what I mean.

And these dont go away.

Try this, this fixed it for me. It only happens on specific texture settings in wwconfig.

[http://laeubi.laeubi-soft.de/cp1/CnC\\_Canyon\\_fix.zip](http://laeubi.laeubi-soft.de/cp1/CnC_Canyon_fix.zip)

This will go into the next CP build.

That supposedly canyon fixed just crashes my Renegade when entry to a server with that map currently being played.

Most likley not related to the map.

But anyways, we are reverting back to the orginal version for the next and final CP1 build.

I used to get that alot. Even posted a picture of it on MLS awhile back. Does'nt happen much anymore...However, I get it ALL THE TIME when I play "Paradox Harbor". I assume I was missing a file that came with that map because it never used to happen.
