I would use firefox, but Netscape has that WYSIWYG editor, and I'm too stupid to use anything else.

I get a blank screen with Firefox, Opera AND IE, so that's not specific in any way.

cowmisfit

n00bstories.com only understands Spanish. Change your local language setting to Espanol and you can access it.

What the hell... I heard people talking about this error in IRC and I thought they were messing around. How about saying "I think there's a problem on n00bstories -- I can't get to [whereever]"...

Anyway, there was just a problem with my web server configuration which I fixed and now it's up.
