Hello Everyone,

I just installed Renegade, and when I tried to go online it said there is a new version of renegade and asked me to download it. If I say no it brings me back, if I say Download, it downloads untill everything is done, but then it says:

Estimated time left: 1 sec ( 18.7 MB of 18.7 MB Copied )

and I can only click [ abort ]

so what can I do .... :S

( Btw i'm new here )

Have you tried to wait a while untill it's done? Instead of pressing "abort", wait a few minutes.

I did this already, waited for more then 8 minutes.

Thank you for replying!

BHAgenius! I'm sorry, probably dumb reply of me, but if I click that link, nothing happens :S I want to be able to play again!!

It's not that dumb, the link he gave you just wasn't 100% perfect. Click the link below.

<ftp://ftp.westwood.com/pub/renegade/updates/>

you don't need to do that. Wait again till it is at "1 sec left", hit abort then download again. it'll complete immediately and finish.

BHAgenius! thanks u all, for replying, i think i'll stick around here

Just go and play renegade, there isn't much to talk about here. But if you do stay here, watch out. These guys aren't always nice!

Do you have nortons internet security or antivirus?? I rememeber when i got my laptop it did the exact same thing. I tried to d/l it again and it did it again... d/l it again and same thing. so i minimized it while at the d/l screen. There was a message from nortons asking if i should block the file. I clicked no and the update started right up. Not sure why it did that because i put it on 3 other pc's and that never happened.

-Mike
