If it's a Movie, make the download a .mpg, .avi etc. NOT a .rar or. zip

If it is a RAR or ZIP archive then for all we know it could contain viruses, also we have never heard of you so nobody is likely to download a file that could contain absolutely anything from somebody we've never heard of.

Change it to a .mpg or a .avi and I'll consider it.

Otherwise

Obviously, if you used a virus protector and scanned the *.zip/rar file for viruses, you would know. Besides, using a *.zip/rar file actually decreases the file size by 500kb-2mb depending on the file. I've just viewed the movie, they are no viruses what so ever, just a plain *.wmv file. :rolleyes:

But, on topic; the movie was pretty good, you got pretty good reflexes and accuracy.

+RST+ isn't a sniper clan, they are a wallpopper clan, there is a difference.

If you
-a- think you deserve to host every game
-b- play 95% of your "sniper" games on islands
-c- think looping is against clanwar rules,

you're a wallpopper clan.

sUpRaDadude. im not even in RST. they asked me to make a movie and here it is..
im just a moviemaker

If you're a movie maker, then why didn't you compress it? (without using Winrar)

A real movie editor would know how to compress it correctly.

The movie is pretty cheesy.. there were some good moments but some of it was lame (I know it
wasn't you in any of it). the wall jump-and-shoot at the front of the bases, "wait for the guy to run in
a straight line then pop out and line up a headshot" thing. but the dude dying in mid air and
spinning was cool.. still islands isn't the best level to snipe on, it's probably complex or field (where
people use the field). nice movie anyway.

i like the concept of this music video and the camera work, pretty cool effects,
beginning was too long tho..
and sometimes people pack videos using winrar/winzip/etc so people will have to download it on
hdd, instead of streaming it off the server few times and lagging it
and one more thing, any viruses and uber leet hacker stuff that are compressed in rar/zip dont
affect ur comp unless u unpack it, but i highly doubt anyone would unpack files like
"pamelaxxxhotforfree..", only exception is spoony

we used islands.mix all becuz of the fps. The only program to record Renegade with is Fraps. Im sure there are some other programs aswell but this was the first thing i found. i tolled fr4x the guy who made most of this frags to use it and the first thing he said was it was ghey cuz he got like fps 15-20 on complex while running the record program. Islands and field gave him 30 fps and so it was easyer to get some kills while recording.

im sorry about the intro and stuff but i first i thought i could make this movie like... 10 min. took me more time than i xpected and then i got some new request from ppl @ Counterstrike. so i diceded to make a intro clib or w/e u wanna call it instead of a long video.

Nice hacks.

2.55-3.01
3.13-3.15
3.20-3.30

In these minutes, you can clearly see that the clan is using some kind of hacks to make the characters more visible through the panels in Island.

I also noticed a point in the movie where you could clearly see one of the walls from the other side of the map in the underground bit!

Subject: RST MOVIE !!

It's not a hack, it's an F8 command which makes the glass more transparent.

Generally used by people who also feel the need to use those repulsive luminous green deadeye skins

i tolled Fr4X to use that command cuz it would suck if u couldnt see ppl fighting on islands. U can see i took some records off 2v2 battles etc. and it would suck if u cuoldnt see anybody dieing or w/e. SO I TOLLED FRAX TO USE THE FUCKIN COMMNAND JUST SO THE MOVIE WOULD LOOK BETTER. now stop trying to proof bs and just say nice movie or the movie sux or tell me what would be better for my next renegade clip. tnx

sUpRaDaand i compressed it..

its like 3mbps bitrate with a .wmv/mp3 codec... and if i didnt compressed that it was like 300mb..

You lack professional knowledge.

3mbps bitrate? That is WAY too high, even for short movie like that. Try under 1mbps (like 768kbps) and the size will be SO MUCH SMALLER and you won't see so much of a difference.

Subject: RST MOVIE !!

View Forum Message <> Reply to Message

Movie was fairly neat, the intro and credits were way too long though. I kinda like how you messed with the way the camera was, fit real good with the song in the background, a little bit overused though, in my opinion

Definitly wouldn't wanna join a game where you guys are sniping though, clear sea water or not

i make movies that run around 500kbs too 800kbs at most..

what video editing app are u using?

im on dial up till the end of the week so i havent seen your vid yet ..

how long is it?

i normally download porno for my freinds and sell it to them..
and HIGH QUAILITY porn runs at 300 to 400 kbs - file size 26mbs - length 10 mins

not sure what file format your recording in..

but try windows movie maker 2.1 for starters if your a begininger..
its free with windows XP

i went to download your vid and saw the huge file format and said "Whoa wtf"

btw lmao @ ppl who are scared of D/Lin zip/Rar files..
"its a hidden virus i just know it" <- HaH

the point of the porn sentence WAS..

that if numorus sites that sell it.. use that bitrate.. and make money doing it..

plus the porn industry is ALL ABOUT being able to see whats goin on CLEARLY.. so they might have to consider things like bitrate/quality

so that meaning it was just an example.. maybe.. coulda been..

Subject: RST MOVIE !!

And how long is this "movie" I can make 5 minute clips that have pretty good quality and are about 20 mb...

No movie is worth downloading if it's 100 mbs... as and epecially if it's from Renegade...

Also...
And using a program life fraps and than "dubing" it doesn't make you a "moviemaker".

well normaly i dont make movies for "renegade flame game of teh year" but for Counter-Strike.. and i think ur wrong cuz u didnt saw any Frag games @ all and i saw movies about 13 min long like 250mb.. and those movies are professional made movies they make money for it and stuff.. so dont whine about "its 100mb" if you can do it better? why dont u just make a nice movie good quality with some nice intro and stuff and send it.. and proof something you dont have :S

Subject: RST MOVIE !!
Posted by TankClash on Wed, 15 Dec 2004 21:42:38 GMT

For it to be "professional" you need it to be highly mobile and your video clip is not that...

You obviously didn't use the correct codec or don't know the correct codec.

This is an okay quality clip, and not a huge mofo either... 25.5 mbs. around 4 minutes long. http://deathrip.chosen-reborn.com/RenAlertVid2.wmv

Look, before you even start acting like a retard and assuming my age, you should know that it's not going to be crystal fucking clear when you do 512kbps. Of course 3000kbps is going to look a hell of a lot better, but 512kbps/768kbps looks good enough. If you want, I have about two or three movies that are compressed under those bitrates and they're no more than about 15mb. My age has nothing to do with your business, and neither does it have anything to do with this topic.

You're German, aren't you?

Yeah, sure, if you want to have nobody download your half-assed job of a movie. Barely anybody would download a 100mb movie that's 4 minutes long unless it's something like an official Half-Life 2 movie.
