I have a couple of skins it will not let me use. Now some people say its because of the w3d files which are needed for my m203 and pistol skin.

It is also causing to not load my game.

Says: Cannot load game. Skins blah blah blah are in the way. Something that sounds like that.

Please help me!

its the w3d that conflict.

Skins are just don't let u join a Pure server.

But is there a way to still have the w3d files and use renguard?

I mean it wouldnt even let me load my game! Those w3d files are needed to have the skins work.
