What exactly do you need done?

Also, define "hansomly."

C&r script

every one get a sniper rifal and base defenses are off once you through your c4 you are automaticly transfored to the enemy barracs or hon to get out of jail a teamate must get into the enemy base and run into the jail witch will automaticly send all troops to their base building and har-v cant be detroyed you cant buy wehics or infantry everyone is a solder with a sniper rifal to win all of the enemy must be capturd then their base will be destroid and the team that captured all the other team wins o and when ever a new map starts it says running in c&r mode created by (you) and the people at http://www.nightstalkerz.tk
