I have rent a Windows 2003 Server and I want to have the server on GameSpy and on WOL, too. I want to have Brenbot and CorePatch, too.

How can I do this, the server is running on WOL perfectly, but on GameSpy not!

HELP pls

Yes, but if i have enable WOLSpy i see the server von gameSpy, but if i want to join, he can't logon to the server. Its load and load but nothing works

The same problem is, if i want only create a GameSpy Server

i can't join

What do you mean it loads and loads?

Does it say "Gameplay Pending?"

If that's the case, just quit and rejoin.

I'm pretty sure you want the GSA port and the WOL port to be the same.

I have found the problem!

You can't enable ssaow on GameSpy Windows Server.

Why??

Look and help me at:

server2.ini add line:

Enable_Gamelog=1

@zunnie

you are from fanmaps.net?

they have 2 servers with the same error

[RG]FANMAPS.NET We Love Renegade! 83.98.155.156:4057

[RG]FANMAPS.NET Co-Op! 83.98.155.156:5060

both are displayed on gsa but u cant connect

They are working for alot of people :S

Not sure when you couldnt connect but they COULD have been restarting at the time you tried to connect, doubtfull but..

They are working :S

BuggyTHX to all, now, works all fine, i must disable the Windows 2003 Server Firewall!!

No, you must not disable, you must 'configure'

And in case you enable the firewall: QUAD CHECK that you ENABLE Remote Desktop or your fu**ed
