After core patch, I can't see some specific hit effect emitters. During multiplayer on wol, blood doesn't show when I fire at enemies. Sparks doesn't show when I fire at vehicles and buildings. However, this doesn't occur during lan and single-player. Anyone know how to make it show again?

I get this aswell (happened before cbp)

I think it has to do with FPS, if your FPS is slightly low it won't show any of the dust or spark effects (a shame really)

It also seems to vary on each map

lol, this game is not good enough to "look good". I got settings turned all the ways down to reduce the laggor.
