It said that i needed to look for help here.. so ill copy what is says:

If you experience problems with Renegade ,e.g. renegade wont start, always.dbs missing, wrong language>, make a note of what this programs says and report it to BH studios:

```
Language ID = 0
English detected
Removing old always.dbs
Removing new german always.dbs
error 2
```

Well... if i start renegade now, i see the screen of RG, then it tries to connect, then it tries to dl the core patch, and then i get an error... that the old file doesnt exists... then it says download is succesfull, but if i try to play then, it tries to dl the patch again.... what can i do about it to fix it??

RenGuard claims yet another victim.

Dont edit my posts you stupid fuck.

You should try:

- Reinstall Renegegade
- Isntall the Rengade Patch 1.37
- Install Renguard

Thst should solve the problem.

What the... now it says:

Language ID = 0

English detected

Removing old always.dbs

Removing new german.dbs

Removing new french always.dbs

Removing new english.dbs

Now renaming scriptssx.dll to scripts.dll

error 17

—

????

what to do now? O.o :S

Oh rofl... it now works O.o

It only still says on the start, that that WOL file is missing... but atleast the game starts Thx!
