When I try to use it, I get in the message thing:

[15] Trying to connect to server #1...Connected

[15] Server is not responding. Trying next one

[15] Trying to connect to server #2...Connected

[15] Secure link established.

[15] Message from RenGuard: You have been banned by mac on 26.10.2004 12:47:52 for codemancq: Involved with leaked brenbot 1.36 build. Talk to mac. Goodbye.

Whats up with that? Is it possible my ip is the same as someone who was involved with it? How do I get renguard working? Im really sick of those popups telling me I need to download it.

I just got the same problem, banned by Mac for bypassing renguard. I've never cheated, don't know how, this must be an error. What do I do?

You wouldn't be banned for no reason.

If you do something wrong, you must serve your time and suffer the consequences.
