Cowmisfit, I'd hate to ask but... remember about a week or two ago you were making me a website template (i think it was you, I know it was someone from APOC), how's that going?

off topic I know but theres a watermarked banner I made, if you want the proper (unwatermarked) one I'll email you the .png (fireworks doc) and/or the jpeg.

Back on topic:

Until I make a better one, this will do.

That artist is wonderful. She really did a good job on that one. I loved it the first time I saw it.

If your referring to my wallpaper at the moment then I agree totally. Lovely piece of art!

If I didn't see progress shots of that piece of work, I wouldn't have believed that the syringes were created by the artist.

It's still the same as it was last month and the month before that. You make too many desktop threads.

I like your wallpaer darkdemin. I was thinking of grabbing a subzero wallpaper last night after playing mortol Kombat: Deception.

Limewire is an amazing downloading application. It really it much better then anything else I have used. I recommend it to anyone. <http://www.limewire.com>

The links that I blurred are to the servers I run as I feel that info is private to myself so that is why I blurred the server link and Remote Desktop Connection links. The server link is also right next to the link to my FDS folder.
