little annoying thing with kicking GTA's
when somebody on your team steals the tank and you want it back.. when you kick him.. the tank blows up
could you please make a command ie !gta <name> so it kicks the player without destroying the vehicle?

thats a feature in SSAOW, you have to disable it via server2.ini

The thing that really annoys me is when someone is in your vehicle and they leave/get kicked and it kills your vehicle.

heh thats a problem aswell
i guess the only fix is to disable it and let te enemy steal the vehicles
