Ok, lately these days on the n00bstories server (where i play most) there are some people that say rg can be hacked. I just wondering how hard this actually is if you're not part of bhs.

PS: If it is very hard then these people should have a can of STFU.

I see a few ppl on other forums that say they can do it, but when i push them to show any prove that they can actualy do it they never can back it up. Personaly i think they are just full of crap... There is a lil problem with renguard(kind of) it but it only aplies to servers that are not renguarded and some verry verry porly manneged 1/2 guarded servers, so technicaly it's not realy a renguard issue(well it is and i's not).
