Explained:

poobuddy(temp-mod) was playing a game with ip of 144.x.x.x

PsCloudy joined the game with the ip of 172.188.124.93 and did !help then !showmods then left.

PooBuddy(notice caps) joined the game while poobuddy(no caps) was in game but got disconnected when PooBuddy joined.

poobuddy's ip then changed to 172.188.124.93

PooBuddy now with the name poobuddy tried to kick 2 players but it did not work(thank god).PooBuddy left the game and now poobuddy can join and now has his 144.x.x.x ip back.

he was a temp mod.. so somebody had to of !atm him

from what i see this was actually poobuddy just faking it  
if you have the ability to d/c a user and know how to fake thier names.. why d/c a TEMP mod..  
why not d/c the admin and then take his name

it's a wol bug/glic that cam be used to go in to a game with another person's name(not RenIP) and then get them kicked out(not 100% sure) from the game, and you will also get all the mod powers that they had. I've never tested it, but i know of it, it was posted on one of the cheating sites. www.un\*\*\*\*\*h\*\*\*s.com hope i'm not releasing 2 much info

Update:

poobuddy has since then made a new name with a harder password.

We run owoserv1 and owoserv2 [RG]Cops and Robbers, and just wanted to make everyone aware of this so if it happens on your servers you will know what is going on.

Thanks to all for the reply's and happy hunting.

Lol you a creator, come on. Renegade has an easy flaw, to fake a name this really isn't new. And actually it can be passworded protected on the servers it self, if it's running a bot I think.

And why should people be forced by you to play the game the way you like anyway?

I so much hope your being sarcastic about this part.

Quote:yeah i may not have a life, but i got a computer, what do u expect a white hat hacker to do  
Come on, a hacker you are certainly not. And the part about having no life. sheesh, You should go out sometime. Lazy Fat "hackers" aren't really what people in this world need.[/quote]

i think we need an update for brenbot/br.net/nightregulator that does ip checks if you !atm someone there ip is stored and then checked everytime they use a mod command, and same sould go for moderators and admins, when they athenticate themselfs there IP is saved and checked just like temp mods, that sould stop this shouldn't it?

Not sure but I guess this maybe able to be put in to mirc script???

It doesn't matter what he does , It's just a game. It's not like he can do any real damage.

So... He read on a forum about a glitch and uses it? So what , That doesn't make him a hacker. All he wants is to feel like he has power , Which he has none.

If you have a dynamic IP , That doesn't mean your not tracable.

Let him do his little rant with poor english. Until this gets locked and he is banned from the forums. The best thing to do is just not reply to his comment.

XeonTeam: Just keep posting, thats want we want you to do, how many pages can we make it?

Others: I can bet what the mods/admins are doing, dynamic ips are annoying but there is a way to ban him/her. We just have to wait. Ill reveal my way of banage later. See what happens with the staff.

AND: brenbot, nightreg both have password support, and as i beleve it, when a player leaves the game, it removes everything when disconnected.

notice who i am. if u do then everything above, i will accept as true... if u do not realise, then i hope this post will be dissbanded, and u will forget.

We shall see who is sad and has no life.

Look, all i want is renegade to go back to how it was origionally. Rengaurd will not stand tall forever. Its day will come. We spy onto you as you spy onto us. We know what packets rengay sends out and recives, we can easily emulate them. Not hard, i bet everyone in this forum could do it.

You will not delete this if it is a stupid glitch, which is really pathetic. Cos if is pathetic then what harm can it do.

**\*\*OPEN SOURCE\*\***

Start Renegade

Click "Lan Games"

Type in the name of your choice

Click "Host Game"

Click "Start Game"

When the game has loaded, pres "Esc" & "Quit Game"

Go back to the Main Menu

Hover your mouse over "Lan Games"

Very quickly press Enter, Up, Enter, which simulates clicking "Lan Games" and "Internet Games" at the same time.

Click "Advanced Game Options"

Select the game of your choice

Enter the game

You now have the persons name that you entered the first time you went into "Lan Games"

Very simple i know, but very effective. But also "pathetic".

Now come one guys,

THATS funny!!!

Why go through all the hoops? you know there are far easier ways to do that right? I mean a guy as smart as you.....

So would someone be so kind as to post this clowns IP and/or cd key so that it can be properly banned on all servers?

sorry for continuing the sillyness, but here goes anyway...

what do you mean

"the way renegade use to be?"

Just say it, you want to cheat. "The way renegade used to be" was AWESOME! No cheaters, lots of fun. Then people (quickly) figured out how to cheat, they posted it to webs sites, punks like you emulated them by useing their knowledge. Now Renguard comes along and brings back

"Renegade the way it used to be"

as in, cheat free. Hey, if you want a cheaters server, why not just put up a server? why does it offend you so much that we dont like to cheat?

XeonTeamLook, all i want is renegade to go back to how it was origionally. Cheats are out. Renegade will never go back to "the way it was". Too many people enjoy cheating to not have any protection.

XeonTeam Rengaurd will not stand tall forever. Its day will come. We spy onto you as you spy onto us. We know what packets rengay sends out and recives, we can easily emulate them. Not hard, i bet everyone in this forum could do it.

RenGuard will be around long after you have given up trying to cheat and hack it, and stopped trolling these forums. As for "emulating" the packets...good luck, they are not static and they are heavily encrypted. Its obvious you havn't even tried to do what you say or you would know it doesn't work.

XeonTeam

You will not delete this if it is a stupid glitch, which is really pathetic. Cos if is pathetic then what harm can it do.

**\*\*OPEN SOURCE\*\***

Start Renegade  
Click "Lan Games"  
Type in the name of your choice  
Click "Host Game"  
Click "Start Game"  
When the game has loaded, pres "Esc" & "Quit Game"  
Go back to the Main Menu  
Hover your mouse over "Lan Games"  
Very quickly press Enter, Up, Enter, which simulates clicking "Lan Games" and "Internet Games" at the same time.  
Click "Advanced Game Options"  
Select the game of your choice  
Enter the game  
You now have the persons name that you entered the first time you went into "Lan Games"

Very simple i know, but very effective. But also "pathetic".

WOW...You are an eleet hax0r...you figured out a bug that does the same thing as the +connect command, that's like telling everyone you figured out that you can hit ctrl-esc instead of clicking your WinXP start button. :rolleyes:

Now scurry back to your rat hole at aol.com.

The person that has done it once in our server joined from an AOL IP, their name before they joined as a moderator was TgSAero, which also maps to trsagreen. Their serial hash is available in the server owners forum for anyone that would like to perm-ban them through the SSC, if they ever want to try and play legit with RG.

A word of advice to Mr 1337 haxxor.. if you're going to do it, you probably shouldn't join a server, !showmods, then leave and come back as one of them... it sort of gives you away, sorry.

Gamebot's been updated to kick the second person to join a server, when a player with that name already exists.. If you do it on The Pits, you'll have about 4 seconds of enjoyment... sorry.

XeonTeam...lotsa shite...

By posting on these forums, you left your IP behind.... By leaving your IP behind, well.... I can block your IP from even connection to my router... so all I gotta do is ask Crimson your IP and gone will you be

XeonTeamwhat do u expect a white hat hacker to do... no i am not a cheater... i am a creator...

First, you aren't a creator. I'm not, nor is anyone else here. Only Yahweh can create.

You are not a white hat hacker (I prefer using the term cracker). Are you decrypting security barriers allowing second and third world countries from using certain software? No. Are you involved in CSS decryption, which allows GNU/Linux users play encrypted DVDs? No. Are you testing servers for security holes? No. Are you finding lawful ways around cumbersome software patents? No. Are you working on OpenBSD, a very secure OS? No.

You're do nothing to enhance or help anything. You're not even destroying very well. Why don't you apply your skills to something useful?

XeonTeamhmm,u think i am a angry teen that cant get laid and that cant play renegade... commin

from you.... yeah i may not have a life, but i got a computer, what do u expect a white hat hacker to do... no i am not a cheater... i am a creator... in away. U ppl call me lame... i say go back to when ren was a GAME! No rengay, or SSG, if we still use it... u ppl wont understand... u drown urself in ur own self importance...

IP! I have a dynamic IP, meaning for unoobies... = simplest terms for u: IT CHANGES EVERY TIME I RECONNECT TO MY ISP (INTERNET SERVICE PROVIDER...) so sad... LOOK!!!! The No0b is going to have a fit that his mom doesn't want to lay him again. Poor guy. What's it like not having a life nor girlfriend.

sw33t, shut up. XeonTeam is just a fucking idiot. He's just like those idiots trying to ruin RenGuard's reputation back when it first come out with "m00hax". He just is upset that he has no life, and this is the only thing that gives him joy and satisfaction except for his right hand.

lol, rengay is allready hacked, if u wanna call it that.

I just put the w3d files into the mix files... lol

Takes rentard ages to find them get a few games in, then start over again.

Its a shame UC is down. Had some new files to upload...

I dont think u know mt telephone number or street address, so...

I have been using HIEW, and a few other tools to hex edit rengaurd, and up until now, i have been able to stop it from scanning DDS files, and have stopped it from auto updateing. But in time w3d files and MIX files will not be scanned.

You sir, are an idiot. None of the methods you mention work

1. RenGuard detects altered mix files
2. RenGuard detects any changes to the EXE

So you see, my bragging hacker wannabe, you are full of crap. You have not bypassed RenGuard in any way, shape, or form. Now go back to using Final Ren on some un-RG protected server and thinking you are leet. :twisted:

This is guy is just an idiot who gets pwnt in real life as well as Renegade so this is all that is left. The list he posted has to be so old and collected over a long period of time because the server that went with the Game-Spy name he listed has been shut down for over 8 months. The "L" on his forehead for "LOSER" has to just stick out.

I would lock this thread and be done with him. Entertainment over.
