Well, my FDS settings are all correct (as far as I can tell), but after it has logged onto WOL (euro) it cant create channels, it just keeps getting an error message, cannot create channel after about 2 mins, and tries again and again.

Strange thing is I tried switching to XWIS and it worked fine

Any suggestions?

well it has remote admin pw on (8 digits) for brenbot. but brenbot isnt the prob, its the fds not workin...

and if u mean pw for enter game.....*checks settings*....yes it is, is that a problem??

yes, sometimes if the pass is too long, or you have certain charecters in it you get that

im not sure what the limit is though

omg, i cant believe the solution was that simple, thx

my pw was 9 letters, i guess the limit is 8 :rolleyes: why cant the fds just tell u tht :rolleyes:
