I don't know if this bug only exists on this server or all servers. It may be an effect of CP1.

I tried blowing them up but you cant lock onto them. I included my artillery in the picture to show that it landed there. Its supposed to land further down the airstrip. Sometimes, it would, but other times, it would get stuck on the wall like in the picture.

Sorry if you already knew about this, but I thought it would be worthwhile to bring it up.

Thats interesting. It might be a CP1 glitch maybe? Or a problem with the C130 Drop script?
