I have a problem with renegade and it might have to do with the files. I don't know if some files are missing or not supposed to be there so if I list them can somebody tell me what happened?

Okay, I go to My computer then to my C drive, into my westwood folder, and into my renegade folder here are the files in there: Data, HTML, Patches, _~DOWN_L~D, 00000409.016, 00000409.256, 54251____, ARI____, BandTest.dll, Binkw32, drvmtg.dll, Game, Luncher, Mp3dec.asi, Mss32.dll, Mssa3d.m3d, Mssds3dh.m3d, Msseax2.m3d, Msseax.m3d, Mssfast.m3d, Notes, Patchget, PATCHW32.DLL, Readme, Readme, Register, renegade, Rengade.lcf, Scripts.dll, secdrv, Uninst, Uninst.loc, Uninst.wsu, Uninstll, Woldata.key, WWConfig

In my Data folder: XXXFC.tmp, awalys, awalys.dbs, C&C Canyon, C&C City, C&C Complex, C&C Field, C&C Hourglass, C&C Islands, C&C Mesa, C&C Under, C&C Volcano, C&C Walls, M00_Tutorial, M01-M13, Skrimish00, Stylemgr, WVAudio

In Patches: No files

In HTML folder: Assets folder, Frame, NavBar, BadPage, Loading

In Assets folder: Bkgd_Loading, Bkgrnd, Bkgrnd_Navbar, Bounding_outline, btn_ok0, btn_ok1, connection_error_title, loading, navback0, navback1, navcancel0, navcancel1, navrefresh0, navrefresh1

In that's it. I have tried reinstalling Renegade 3 times, When I put the disk in it goes to setup menu, like Play Game, explore CD, etc. I click it and nothing happens it just stays on my desktop. SO if anyone could help me it would be extremely helpful I really want to play Renegade again!

i think you are in the wrong section but oh well, ok let's start with what version of renegade do you have? have you installed the 1.037 renegade patch? if no then get it here ftp://ftp.westwood.com/pub/renegade/updates/Renegade_1037_English.exe also what happens if you go into your renegade folder and try to run game if that gives you errors let us know, also if it works but doesn't let you go into a game (no cd found type of error) then get the nocd renegade patch. at http://www.beaconpedestal.com/nocd/djllaptop_renegade_1037_nocd.exe
PS do you have reanguard installed?

Can we assume you can't get Renegade to run at all? You never said.

There is a bug with the autolaucher on the play disc. Just close it and launch Ren from the shortcut on the desktop or from the start menu.

If it does run, what exactly is the problem? You seem to think you're missing files but if Ren starts everything should work okay.

Okay, I'll try that thanks. ANd when i downloaded the patch everytime I click play it says it needs to restart the computetr and it has done it 3 times now. Should I take uot the patch? I also put the patch in my Patch folder.

Okay, do things in this order:

- 1)Install Ren
- 2)Patch Ren
- 3)apply no-cd patch
- 4)restart the computer
- 5)install RenGuard
- 6)download the Stand Alone version of CP1(no offense to the team but I prefer to get my patches separate from everything else, tis one of the reasons I hate Steam)
- 7)restart the computer
- 8)install any maps or character/vehicle/weapon skins you might like or need(I have smiley faced c4 and smiley faced bullet holes for instance)

If all this goes according to spec you should have a fully customized install of ren ready to go.

So I uninstall Ren, and do all that. And I use the same links on this thread? Where do I download the stand alone version of CP1? And what if it keeps doing that promblem when i downloaded the

patch everytime I wanted to play Ren it would say Renegade needs to restart for the patch to work because my computer restarted 3 times.

DRIFTER, did you try this?

Quote:launch Ren from the shortcut on the desktop or from the start menu

Have you also tried opening the game.exe in your Renegade folder. That is the same thing as opening it from the CD.

Do not bother with renguard or any crap. you need to have your renegade working before you do anything.

you mentioned a problem with the 1037 patch. Put the patch exe in your /renegade folder and apply it. Restart the computer again. problem should be solved.

When you uninstall, don't forget to delete the Renegade folder just in case.

edit: spelling
