I was just wondering what names you (the BHS) thought of before using the name "RenGuard"? I know it's a dumb question, but I just wanted to know for fun.

The Original Concept phase in RenGuard already called it RenGuard. I suggested the name originally..

The first version of the RenGuard client, was called "RenGuard"  
I can still remember the alpha builds of renguard, a nice command-line app that had all the protection features, nothing else, was very fast and didn't use much memory at all.
