I had this bug.
After the command prompt box says this error, does it close?
If so, I wouldn't worry about it.
As long as you have a Scripts.dll about 611kb & Scripts2.dll about 1.99mb then you are fine.

I could close the box. I also looked in the renegade folder and found a scripts.dll and the size was 1.99 MB. Hope thats what you meant, cause i'm gonna go try to play. LOL   Crossin everything. thanks

In order for CP1 to fully work, you must have the 2 above files.

Shall I say it again?
I saidI had the same problem too but jw fixed it for me. To do that go to your ren folder and delete scripts.dll and rename scriptsx.dl to scripts.dll

It might work for you
