why cp1 makes your server shit ??
it sux if you loke to your fps's it takes your FPS fucking down normally 60 and now between 20 and 40 ik let your sfps between the 50 and 60 but the server give lag like a sfps of 10 :S why is that ???
and you can say it problem is your pc but server without cp1 are playabler than cp1 servers maybe you need to fix first al the bugs before you bring something new in the expansion

The only people that say "OMFG, CP1 MAKES YOUR FPS GO DOWN LIKE FROM 60 TO 10!!!!!" is the people that are running Intel Celeron 1GHz, 128mb RAM, Windows 98, 32MB ATI Rage, etc...

maybe wen you sent me a good configuration its work better but I set Server.ini the same as a year ago with brenbot 1.35 or something and that works fine.

BTW; When i set the server on snipermaps under_sniping.mix etc the big boxes arent there. is this because there is non configuration for this map in server2.ini ??? if that is it maybe i can see when i removed some map config there the server goes better it's maybe an Idee.
