Or hit F8, type EXIT, and hit ENTER when you are done playing.

Since I downloaded cp1 ren always hangs for like 5 minutes when i quit. So now I either just alt tab and close RG, or if I remember hit F8 and type ex.

When I just try to quit normally it's really annoying though :/

It seems to be an SP2 vs CP1 issue.. just always use EXIT, it works faster than quitting the conventional way anyways.

Have you attempted to play the game with the same resolution and color depthas your desktop? I get the problem too, without the blackhand-studios patch, but playing the game with the proper color depth and resolution stops the occurence.
