Hey,

This may seem like a total waste of time but hey I'm gonna ask anyway. Crimson would you consider slightly altering your search script?

At the moment if you type in say FM to look for all the FanMaps people you get loads of the rtfmi people returned in the search.

Could you make it so that if you type in FM it looks for only people starting with FM and make use of wildcards like * for anything before or anything after?

Also would it be possible to make use of delimiters like ; so you could search for FMZunnie and WNxCABAL on the same search?

I think this would be a nice addition to the search engine on your page.

Many thanks

Tilly

Are you talking about the text-only search at http://www.renguard.com/_scripts/rglocate.php ?

Yeah, that's what I mean

Is that a possibility?

Tilly

Well, the "other" is intended for people who write mIRC scripts and websites so they can grab the information from us without trying to parse out a huge HTML page, like http://www.renguard.com/_scripts/rglocate.php?q=fn

I will make an "advanced search" for you, stay tuned.

When I suggested that a more advanced version of Till's changes be applied to Renguard, mac said it would require an alteration of the protocol, which wasn't feasible at the time. Did this change?

OK, the locator has been updated.

Example: http://www.renguard.com/locator.php?advq=fn*

Just use the lower Advanced search form to do it.

By any chance can you add this to:
http://www.renguard.com/_scripts/rglocate.php ???

[View Forum Message](#) <> [Reply to Message](#)

It's already added... I did it there first. Just add &type=adv to your search, such as:

http://www.renguard.com/_scripts/rglocate.php?q=fm*&type=adv

Thanks Crimson,

You as Andy says are a star and you do so much for the community.

I'll check it out now.

Tilly

Works lovely

Can I just ask for one more thing? (I know that is a pointless question cos I'm going to ask anyway)

Is it possible to have a search so you can type in multiple users. (Up to a maximum limit of course) So I type in FMZunnie; WNxCABAL; WNxTiger

Then this would bring back only the results of the people that it found.

This would be cool

Tilly

[/EDIT]

Write an mIRC script to do it, other than that, its completely pointless to do.

[View Forum Message](#) <> [Reply to Message](#)

Not for what me & Tilly are doing.

An IRC script would be useless for what we want.

[View Forum Message](#) <> [Reply to Message](#)

What are you trying to do? Because anything requiring that basic knowledge would't matter if it came from IRC or a website, whats the difference?

I have nearly created a nice looking GUI Renguard Locator for our clan.

<http://img199.exs.cx/img199/8547/rgbeta3gl.png>

Tilly has made a RG Buddy List, but operates slow because of the single searching technique. With a multiple search technique, it would allow the buddy list to run faster!

It is Andy's idea that we are trying to accomplish and we have done most of it we are just working on speeding things up which Crimson has now helpd us with. We would just like one more request done and then we are happy (For now)

Tilly

http://www.renguard.com/_scripts/rglocate.php?q=*&type=adv&limit=1000

Btw, please fix the way that GUI, its hideous.

A buddy list is on my list of things to do. Thanks to snipesimo I should be able to have a WOL locate for players who aren't on RenGuard servers.
