I can't do this level. I did it once before, then my memory chip got all its data wiped. I have done everything else on perfect agent, but this is really tough. it's like the level was programmed up to be so tough, you have to practically hit everything with the maunder charge-up shot first time, or you get blasted away provided you take things on without maian help.

I know that after the first skedar king it gets easier since you aren't run down with enemies, but I usually die at that bit as all my A.I. allies are killed by skedar warriors and the skedar king has like 100% accuracy.

Any tips. please..
