I assume this hapend, while u were working in Windows?
if so first restart ure comp now. Check cables to ure Soundcard.
If that doesnt fix it. The latest software u installed might be causing it?
Find a newer sound card driver version.

Majjin Vegeta plug your speakers into the right hole

That has happened to me sooo many times

either:

- a) speakers not plugged in the right hole.
- b) speakers not plugged into wall socket.
- c) speakers not actually turned on.

Go on, which one was it?

lmao, so it was the volume?

haha, you're not the first mate, many people at work who I support do the exact same thing.
