Anyone know of a public !teleport <location> script that I can add to my CTF server. One that only like mods and admins can use!?

That can't be done right now, but I can't see it as a very hard thing to do. It's already possible to limit certain commands to mods/admins only, and it is also possible to teleport. Although, I dont know if anyone will be willing to make this. I certainly don't know how to do it.
