You can often fix the game2.exe error by switching your current game2 (the renegade main executable) with one somebody else is using with renguard. as such, try replacing yours with this one.

<http://homepage.ntlworld.com/k.livingston/game2.exe>

please note this copy of game is a no cd modified version. Have your friend or someone else send you theirs if you want an unmodified one. BUT, it does definetly work.

Can somebody please mirror this download? my ntlworld thing isn't very fast

Thanks, I just installed renguard this morning...

and got the Unauthorized game2.exe sent it to recycleing bin and then it said rene not found...

Now it works like a charm, Thanks man!

Just remember that if you get one of these off someone else, get it from someone you trust. It's easy as shit to attatch a trojan to one of those.
