Uninstall, delete the original file, then play a better game and/or mod.

Try running Game.exe instead, Renegade.exe or the Reborn launcher (reborn.exe?) has a built-in loader, that doesn't really work.

2000_yearsthat doesn't really work.
The mod doesn't really work either.

Technically it "works", but in the eyes of most for playability and performance, it doesn't.

I had to tweak it and install it manually when I played it.

j_ball430, stop being such an abraasive wanker. If you're not going to graciously answer the question asked, don't respond at all. This is a Renegade modding forum. It is not unreasonable for a person to expect to be able to come here to recieve help installing a mod for Renegade without being berated for their choice of mods.

My thoughts exactly.

In short, if you can't help the guy, cram it.

I don't see you two helping him at all. In our view it's a great help to that person telling them that Reborn sucks and that you should get rid of it.

The fact that it's caused many people to reformat their computers should be a testament to that.

Aircraftkiller a.k.a. ACKIn our view it's a great help to that person telling them that Reborn sucks and that you should get rid of it.

Aircraftkiller is right, our advice works. If he doesn't have it installed, it can't exactly keep having the same problem, now can he? I didn't think so.

Plus, did I berate him for his choice of mod? No, I just told him what me (and the majority) think of the current Reborn release. Even you two can't disagree that it's quite a bit sub par. Sure, some may find it entertaining, but I know it wouldn't be the gameplay that does it for me. I'd be laughing at the horrible workmanship. Plus, just so you two don't start accusing me of "bashing" Reborn because of some of the current members of their team, I'll just point out that I never did make a reference to the current team. I don't hold them responsible for the work that the old team did, but I do hold them responsible for allowing that version to be downloaded and attempted to be played.

The old version is no longer supported, and the download link is gone.

but since u already downloaded it, to make it work change the shortcut to point to <rebornfolder>\game.exe instead of whatever it installs as, this worked for me.

I think its a good mod, and recommend you try it. Although it is obvious is it a very early version, it shows a lot of promise...

How can it show promise? They don't even have the same team. That released version IS the final version of that Reborn team.

It is in fact not the final release as you know all too well

I never denied that. I know it's not the final release of the Reborn mod, but it is, however, the final release of that Reborn team, and therefore it can't show any promise because it's a whole new staff using their own work.

Well that's nice, because I've never found Reborn to be sexually attractive. I think you're trying too hard to be funny, or perhaps not hard enough... If you could get hard at all.
