Subject: Change Camera Angle Script Zone?

Is it possible to have a script that when somebody enters a script zone, it makes what ever object is in the zone change its camera settings until it leaves the zone?

For Example, if somebody was to be in a GDI APC and they entered the script zone, it would change the camera view from [GDI\_APC] to say, [GDI\_Orca]. Then when it exits, it returns back to its factory setting?

Cheers,

Andy
