Going from memory, you put the mod in your /DATA/ folder, then start a new game (a LAN game?) then select the mod package from the map list. Click Start Game and boh-shank, you have the mod working.

Hope that helps

Was that my Recon Bike drop mod? The one that I put on PC&C way back when? Well, I'd be honored if it was but it probably isn't, so anyway to install just dump the cnc_c130drop.txt file into your Renegade data folder (C:\Westwood\Renegade\Data)
