Hey, some of you may know me. I am a mod in the non00bs server, but I havent been playing lately. Mainly because I cant get renegade installed without a CD drive.

My CD drive doesn't work so I want to try and install renegade without the discs. I got all the files off the discs which I accessed from our home network. I can't run the setup.exe without a disk. If it is not possible, can someone help me get Renegade installed?

What you need to do is, download the ISO's somewhere.
By bittorent, ore whatever you use.

Then use DeamON tools to mount the ISO, you wont need a cd Driver for this.
But you will have to leave your pc on for lik 24 hour's for both CD's probly.

Other then that, a new CD driver isnt expensive you can get a CD/DVD ore CD/rewriter rom for like 30\$ and you got a good brand then!

Well, my friend gave me an extra cd drive that was laying arround, and it worked for him. But, it didnt work for me. I tried swithcing out the IDE cables, but no luck there. I think it may be my motherboard I'm not sure though. Get on MSN JP...I will be on all day.

You need to get alcohol 120% and make some images, and mount it on a virtual drive.
