When i try and run country meadow map (aircraftkiller's one), just as i start to run outside ren crashes and an error report window comes up. This has started to happen just after i installed that map pack. It used to happen when i had sole survivor too, any ideas to why this happens

it's the weapons factory, don't look at it

just open a random map in LAN, play it and look at the WF there.

Then try meadow again..

worked for me
