Hi I saw the screenies u posted about creating a clan.Now I would like to know is do you also have a few for members finding clan and registering with it.  
We created one and would now like to have our members register with it but looking at empty boxes is driving me crazy.We have the pw info for our members but a few days later i could not find the clan even in recently added.  
So please if someone has screenshot of it could you please post them would be a big help thanks.Or a stepp by step meaning click 1st or 3rd box from top or bottom kind of thing thanks.

Yes, thanks Spoony... your other "sticky" topic on Page 2 of this forum was invaluable in starting our own WOL clan.

Maybe they could sticky this one?
