I've seen in a lot of tutorials that you have to put a wierd vehicle in the wf or on the air, where is that vehicle in level editor??? I've been looking everywhere and i can't find it. i really want the airstrip to work, i don't care as much about the wf (i only use the airstrip for c130 drop mods)

Thanks

DROP ONE

Anyways...

If you select the building controller, and press Ctrl + P, it should make it appear.
