You know what else is funny... Vitaminous TRIED to DoS the forums, but remember the anti-DDoS script that sometimes gets false positives? Well, it caught our little idiot and dropped his packets, and of course logged his transgressions for safekeeping.

I see something different than WNxCABAL  
The bunny I see on that platform thing is standing. I can make a screenshot, but I don't have a place where I can upload it.

all the shit has been removed from the post. It was a god damn joke and Crimson took it way to seriously, especially for some of the other shit that has happened on this forum.

HTML has been enabled on these forums for the more than 2 years I've been hosting them. It was enabled because it was the only way to get the old posts from the Westwood-hosted forums to import into these forums correctly. For two years we haven't had a problem with this until some people decided to act like children with a new toy. They will be banned for a week for this. On the other hand, I fixed the bug that allowed them to use HTML tags that were not supposed to be allowed, so when they are unbanned, they won't be able to do it again.

I've sometimes noticed the FireFox keeps things cached for a much longer time than IE, that may have been it. . . However, it looked fine for me in Firefox yesterday
