The server can't tell the difference between real and fake JPNOD's. So when it reports the game results to the ladder, and it sees "JPNOD" has played in there, it's going to give JPNOD the points.

Well, i dont care much about the WOL ladder anymore.. but what you are saying here is that. If i'd go idle with nick for like a night.

Next day hele' be like -8000 ladder. I know the Mods/owners will notice someone being afk for a long time. And if they find out it isnt the real name they will ofcourse ban him.

And how do i ban this guy, becaus if i do JPNOD: ip xxx.xxx.xx in the banlist it will just ban me :/ ore just only put in the ip.

Thanks in advance!

Just put like: fake_me:80.132.93.15

It will just ban that IP.
