I have installed Renegade FDS properly, Installed ssaow properly, and it has no been reporting ingame message's at all. And I have Noticed that DDE Server is not working at all.

Look for files called renlog_*.txt, reporting ingame log is a feature of the renegade server, and not ssaow.
DDE does not work in the latest ssaow version yes, mac forgot to include it

Well I would have to say: SSoaw reporting ingame message's (team message's) would be a good idea, so someone wouldnt have to parse 2 log files..., and Getting that DDE server included would be wise.

can anyone link me to a version that supports DDE(Newest)
thanks
