i know this should be in another section but there isnt one for CP1 anymore so i decided to put it here.

everytime i try to install the CP1 i get this error message in command prompt.

```
language ID = 0  
English Detected
```

```
Removing old always.dbs  
Removing new german always.dbs  
Removing new french always.dbs  
Removing new english always.dbs  
Now remaning scriptsx.dll to scripts.dll  
error 17
```

i was only able to get CP1 to correctly download one time. after that it never worked agin. anyone know whats going on? and how can i fix it?

thanks for any help.

Ignore it.

In future, use the search function.

i tryed the search function and found nothing that would help me out.

after the first time i downloaded the CP1 when i would use a radio command i would get little things that would pop up over my or others head. since having to reinstall renegade (many times) i havent been able to get those back. and since then i have been getting this error message. if there is any other info tha would be useful i would be glad to get it.

<http://www.renegadeforums.com/search.php?mode=results>

search 'error 17'

You need to download the latest scripts. Ripintou posted them recently in both these forums and n00bstories.com, search for "scripts" in the title.
