what i did was i moved renegade on a external HD with leveledit but when i move it to a diffrent computer leveledit wont run(gets a dont send error when loading) if it does'nt know renegades installed although it is. Does anyone know away to make it work without installing it on every computer i move it to.}

you cant. leveledit needs the registry settings which are made by the installation program, so you have to install it on every comp u use it on.
