Is it possible for the Renguard admins to compile a list of the Top Ten highest number of different nicks used to log into Renguard?

I just want to see if I win the prize

That's what he means I guess.

Hmm, why do people have 50 nicknames when only the standard amount 4 is way enough. For me, even one is enough.

Clanhoppers and such. Also, suppose you have your clan rank on your name, that'd be another reason for a lot of different names.

And then other people just like to have lots of names to confuse others.

I'd prefer to have statistics on the use of renguard overall. Since when it was released untill now in a little graph how many people are using it, e.g. every month.

`Yearly' Graph (1 Day Average)

Max Network Users   632 users   Average Network Users   392 users   Current Network Users
 409 users
Max In RG Servers   304 users   Average In RG Servers   132 users   Current In RG Servers   214
users

Please note that those figures are the 1 Day Average, and actual user peaks are much much
higher. I started these statistics about a month after RenGuard's release. The graph is backwards
-- the current day is on the left, NOT the right.

Note the downward decline in users lol

 should have read the whole story first (my bad)

What I should have said:

Note the upward rise in users w00t!

[/edit]
