I downloaded the always.dat and script.dll file and overwrote the ones I had. I tried to install the core patch and it's telling me it can't find old file and it stops.. Some issues while installing from the original Cd. Yea u herd me a true copy (not for you pirates) Never had any issues until I installed this Video Card Ge Force 4000 AGP 128 DDR

PLEASE GET ME FRAGING AGAIN

It's because you downloaded an always.dat and scripts.dll file. that horrible installer is really buggy, it really isn't your fault; I've had issues with it too. It must find exactly the file it wants before overwriting, not a replacement of it.

Only solution is to have the original files....and you know what that means....you gotta install renegade again.

Update to 1.037 first before installing any BHS product!
