RenGuard has ZERO impact on what you see on any game list. Try double checking your filters and refreshing the list. If all else fails, and you know the server is up and running, then the RenegadeIP program can then be useful.

Luckily, UNRULES.COM newmaps is a WOLSPY server, so you can join up from westwood online.

failing that just go ask what the IP is on <http://www.unrules.com> message boards, but search the forum first
