Be nice guys

PsYc0, if you don't get a response you need and Crimson or a member of the Dev team of RG at BHS don't reply.

I'd recommend PM'ing Crimson and await a solution.

Andy.

Right, the page. You only get paged on some servers. I don't think that's the problem. you are referring to page about it being a half renguard server?

The sound is that 'renguard initialising' sound, which can be enabled or disabled using the renguard options dialog. Have you tried unclicking the sound and seeing if it still crashes?

Then you say it happens only sometimes, and if you change nickname, it doesn't happen. It sounds to me like a server-to-client bug where the server is trying to recognise if the client (you) is using renguard. because that's about the time your game is crashing.
