It uses PHP's "pspell" libraries which I affectionately refer to as "pee smell". They are leet.

I will have to add custom words to the dictionary, too.

Just because i aint got PERFECT spelling, dont mean i cant insult the people who cant even spell out "you" or "are". Plus, im southern, so that makes up for my use of "yall" and "aint" which aint real words, really. They are down here, though!
