was this after you installed CP1? anyways there is a file in your renegade\data folder called "stylemgr.ini" open the file and replace what it has with this. This is the original settings for the fonts that you have when you first install renegade. Hope this helps...

Quote::

```
; STYLEMGR.INI

How long?

Same thing happend to me and a all the ppl that installed CP1, and it took me about 2 mins to find

out what was wrong and find how to fix it.

Try modding your Renegade Menu by changing all the font styles and modifying their sizes slightly. This can make great changes and I know after I changed some settings, including the sounds made when clicking links, the menus were more interesting.
