I know this is probably a dumb question, but is there a mod or sumthing that makes that stupid gameplay pending go away if there is only one person ingame???

Well, is your player number for the game set to one or more? Also, do you have the latest Renegade patch downloaded and installed? Or maybe your just trying to do this when the player number is set to 8 or whatever, and since your first one in, you can start playing until other people join. Otherwise, I am not quite sure what you mean.

thats what I need, when only one person is ingame, it says gameplay pending, I want to make it so that if there is one or less people that the game continues to run instead of waiting for 2 or more people to join.
