I just recently installed CP1 and when i start up renegade i get a Scripts2.dll not found. can
anyone help?

I can help

1.) Rename the file "scripts.dll" in your Renegade directory to
"scripts2.dll".

3.) 1.) Download http://puzzle.dl.sourceforge.net/sourceforge/rentools/script s193.zip

4.) Rename the "scripts.dll" in the download to "scripts2.dll"
and copy the file into your Renegade folder.

It should work now

I thought cp1 was supposed to do that automatically?
I had a scripts 2 long before cp1 came out, so i am not sure..
