Just curious... I just noticed that my sig (which normally says American Cancer Society said american't Cancer Society... After trying to fix it, it would keep doing that like a filter until I bolded the first letter.

Can you not say American here?

Edit- I also noticed that when I put american't w/o bolding it shows up like this == American

American

America

Hmm?

Its a device that let us know you a terrorist.

nah just kidding!

Is there some kind of subliminal messaging in this thread or something?

I have a replacement that changes "American" to "American", so the software does the opposite when you do an edit. I have something that does out-war(you know what I mean) to n00bstories.com so when I edited my sig it said out-war.
